Columbia, 20036, United States**

1800 M Street is a WiredScore Gold building

Being a WiredScore Gold building means that 1800 M Street can support occupiers with significant technology requirements. The building has been designed to provide occupiers with access to multiple high-quality internet service providers and a variety of cabling types including fiber. Ample wireless connectivity and backup power resources have also been put in place. The infrastructure in place ensure connectivity sources will be protected, diverse, and prepared for the connectivity needs of future occupiers.

An overview of the experience at 1800 M Street

Category	Your experience at 1800 M Street	Regular building experience
 Mobile and Internet	Enjoy excellent connectivity throughout the building, powered by high-quality fiber infrastructure and internet service providers.	Expect frustrating interruptions and dead zones as you move throughout the building due to patchy digital connectivity.
 Set-up	Enjoy seamless and effortless internet setup with multiple high-speed providers at your fingertips with streamlined legal contracting. Ensuring you easily find the perfect match for your needs and enjoy a smooth, hassle-free digital experience.	Experience a tedious and slow process to setup your internet connection.
 Future-ready	To meet your needs far into the future, the building is equipped with spare capacity in the risers, point of entry and telecommunications room. This ensures the building can accommodate new and emerging technologies, providing you with the flexibility and adaptability you require.	Risk future problems arising from an internet connection and mobile connectivity that can't keep up with your growing needs.
 Resiliency	Your building's robust infrastructure, including diverse and secure risers and telecommunications rooms, mitigates most risks to uninterrupted connectivity.	Experience frequent productivity loss and general frustration resulting from your vulnerable, and poorly secured internet infrastructure.

Connected building highlights at 1800 M Street

Mobile and Internet

- Free Wi-Fi in amenity areas allows you to be connected throughout the building.
- Strong Wi-Fi performance with minimum speeds of 10Mbps throughout the building.
- Easily install fixed wireless, satellite and mobile equipment with dedicated space and cable pathways to risers on the rooftop.

Set-up

- Install times are minimised with ISP connection points present across the floors of the building.
- Easier service installation enabled by spare capacity within the below-ground telecommunications cable pathway.
- Secure access to risers on each floor prevents unauthorized access and accelerates the installation of connectivity services.
- Protected routing enabled by a top-to-bottom riser expedites the installation process.
- Capacity in risers enables fast installations of new connectivity services.

Future-ready

- New internet service providers can be installed quickly with available space in the telecommunications room.
- Signed ISP agreements are available to streamline new connections.
- Standardized ISP agreements are available to streamline new connections.

Resiliency

- Your connection is safeguarded by a secure and dedicated telecommunications room.
- Connectivity infrastructure in the telecommunications room is protected from flooding.
- An audit of the telecommunications installation verifies best practices are followed.
- Enjoy reliable connectivity thanks to diverse riser routing throughout the building.
- Reduce the risk of damage to cabling with diverse cable routes between POEs and telecommunications risers.
